

Product  
Handled: **Cable Reels**

**Problem:** The procedure is to put a lifting bar through the reels' axle hold and lift with a pair of slings on a spreader bar. This requires the operator to lift a heavy steel bar and push it through both reels exposing them to both lifting and twisting injuries.

**APPLICATION:** Transferring pairs of cable reels from the staging dock to a flat bed trailer.

**SOLUTION:** Custom-designed Positech Slide Gripper end effector with ACME self locking screw drive. Gripper Safety Circuitry preventing release from the cable reels while suspended. Quick disconnect gripper power allows changeover in less than 1 minute.
